

WESLEY SANTOS DA SILVA

PROFESSIONAL SUMMARY

My focus as a developer is on building systems that work well and that people enjoy using. I have a special passion for thinking about code architecture and organizing the structure. Whether it's managing an application's states or improving a feature, I like to understand the "how" and "why" behind things and how to make them better.

PROFESSIONAL EXPERIENCE

Junior Game Developer | Jan. 2026 – present

Self-employed

- Development of responsive mechanics and controls for platformer games.
- Code management and version control via branches for seamless integration of mechanics.
- Structuring character behaviors using state machines.

Store Associate | Aug. 2023 – present

Mimo bom distribuidora Ltda.

- Provide customer service and sales support focused on meeting monthly goals.
- Organize the store layout, set up window displays, and continuously restock products.
- Provide logistical support for receiving merchandise, inventory control, and inventory counts.

TRAINING

Adventist University Center of São Paulo (UNASP)

Bachelor Science in Computer Science | Feb. 2021 – present

- Object-Oriented Programming (OOP), Data Structures, and Algorithm Analysis.
- Theoretical and practical knowledge of the software development lifecycle, requirements gathering, and the application of design patterns.

LANGUAGES

- **Portuguese:** Native
- **English:** Basic / Technical
- **Spanish:** Basic

FEATURED PROJECTS

Inventory Management Website / SimpStock

Programming languages: Python, JavaScript, HTML, and CSS

- I built an inventory management system using Python, JavaScript, HTML, and CSS. The application manages product and user records and JSON data, and integrates the backend logic with a functional interface.

Crimson Ronin / Game 2D

Engine and language: Godot / GDScript

- I created a 2D action game featuring unique logic for each enemy, combat mechanics, a loot system, and precise animation control for all entities.
